### Technical Specifications:

Type	Tack	DM mm	Drying min
Pantone base colors	7~9	33~39	≤750

Viscosity: tested under 32°C, 400rpm, 1 minute data  
DM: tested by parallel plate viscometer under 25°C, 1 minute spread diameter (mm)

**PANTONE®**

### Packaging & Period of Validity:

- ✦ Package: 1KG vacuum tin.
- ✦ Guarantee Period: 3 years. If the technical data is still qualified, products could be used out of date.

### Using Suggestions:

- ✦ It can be used directly under qualified condition. Under low indoor temperature or bad paper surface condition, we suggested add reducer or varnish (<3%). Under high humidity or other setting affected condition, we suggested add optimum desiccant (<1%).

### Notice:

- ✦ The above data is tested strictly in laboratory only for reference. We suggest customers to test the products first before printing because different printing environment and substrates may have different results, so we won't make any warranty to the real effect of the products.
